Fictional three-patient Exampletab series

M. Okonkwo; R. Singh (invented)

Fictional Pharmacovigilance Letters 2024;12:1-2. Made-up sample.

Abstract. Three separate made-up people, each with a different reaction to Exampletab.

Case A. A 22-year-old woman developed headache one hour after Exampletab 10 mg. Recovered.

Case B. A 55-year-old man developed a swollen tongue after Exampletab and was treated in clinic. Recovered.

Case C. An 81-year-old woman fell after dizziness attributed to Exampletab and stayed overnight in hospital.

None of these names were collected. Sex and age are the only identifiers given.

Lot numbers were not stated. Photos were not mentioned.

The splitter should emit three cases, not one blended narrative.
