

SYNTHETIC / FICTIONAL ? not a real patient, product complaint, or publication.

Fictional pediatric vomiting after Examplemab

L. Brooks (invented caregiver report, written up by a fictional clinician)

Fictional Pharmacovigilance Letters 2024;12:1-2. Made-up sample.

Abstract. One made-up child is described. Age is 8 years.

Case. An 8-year-old boy (Taylor Brooks, fictional) received Examplemab 20 mg subcutaneous. The night after the second dose he vomited twice and felt tired. He recovered the next morning without hospital care. Weight 26 kg. Country: United Kingdom.

No quality complaint is described. The product packaging was intact.

Discussion. Pediatric fictional cases still need the same extraction fields. Height was not recorded. Start date was not stated.

Reviewers should refuse to invent dates or seriousness beyond what is written.
