

SYNTHETIC / FICTIONAL ? not a real patient, product complaint, or publication.

Two fictional Exempletab cases in one letter

S. Ortega; K. Nair (invented authors)

Fictional Pharmacovigilance Letters 2024;12:1-2. Made-up sample.

Abstract. Two distinct made-up patients are reported so the literature splitter can separate them.

Case 1. Jordan Hale, a 33-year-old man (fictional), received Exempletab 40 mg. He developed hives and lip swelling 15 minutes after the first injection. Epinephrine was given. Outcome: recovered. Country: Australia.

He had no listed medical history. Dose start date was 04 May 2024. Stop date was the same day.

Case 2. Priya Shah, a 70-year-old woman (fictional), took Exempletab 10 mg daily. After two weeks she noticed yellow skin and dark urine. She was hospitalized. ALT was 510. Outcome: recovering. Reporter role: physician. Country: India.

These two people must not be merged. Each is a separate identifiable patient case.
